

Product Information

PRECAUTION TO BE TAKEN

1. The switches shall always be used within the rated current and voltage.
2. The switches shall be soldered in the manner, at the temperature and within the time as specified.
3. The switches may not be washed.
4. In the event that the switches are used for input in such digital equipment as microcomputers, the equipment shall be designed in due consideration of chattering and bouncing.
5. When you store your switches, you will please take care of the storing conditions.
Any storage in highly humid, high temperature and corrosive environments or storage for too long a period will lead to discoloration of terminals and/or reduced solderability.
6. In the event that you use your switches under any electrically or mechanically not usually conditions or operate in any special way, you will be asked to consult us.
7. IPX7 water resistance is guaranteed for the switch alone and performance may not be guaranteed depending on the mounting conditions and usage.

NOTICE

1. Any products mentioned in this catalog are subject to any modification in their appearance and others for improvements without prior notification.
2. Be aware that the specification given in this catalog are for the referential purpose only.
3. Details given in the standards/SPECIFICATIONS do not cover all specifications of the product.
4. The details listed here are not a guarantee of the individual products at the time of ordering. When using the products, you will be asked to check their specifications.
5. The model names of switch represent the types of model, and do not specify any particular specification. When ordering you will give us the number of the products stated in their specifications.
