1 to 4 cells lithium-ion/lithium-polymer battery Secondary protection IC MM3284 Series

Outline

MM3284 series are secondary protection IC using high voltage CMOS process for overcharge protection of the rechargeable lithium-ion or lithium-polymer secondary battery. The high accuracy overcharge detection of each cell of the rechargeable 1 to 4 serial cells lithium-ion or lithium-polymer secondary battery is possible. With a timer circuit built-in, it is possible to set overcharge detection delay time.

Features

(Unless otherwise specified, Topr=+25°C)

1. Range and accuracy of overcharge detection/hysteresis voltage

 Overcharge detection voltage 4.0V to 4.5V, 5mV step Overcharge hysteresis voltage 50mV to 1000V, 50mV step

2. Range of detection delay time

Overcharge detection delay time 1ms to $(1ms \times 2^{n1}) + (1ms \times 2^{n2})$

*n1 and n2 can select two arbitrary integers between 0 to 13. (However n1≠n2)

3.Low current consumption

Typ. 2.5μA, Max. 5.0μA (Vcell=3.5V) Typ. 2.0μA, Max. 4.0μA (Vcell=2.3V)

4. Absolute maximum ratings

●VDD pin VSS-0.3 to VSS+28V ●OV pin VSS-0.3V to VDD+0.3V

-55 to +125°C Storage temperature Operation temperature -40 to +110°C

Pin Assignment

Top view SOT-26A	Pin No.	Function
